Professional Summary

Full Stack Developer with 3.5+ years of experience designing and delivering scalable enterprise web applications with enterprise-scale exposure at Infosys. Strong expertise in Java, Spring Boot, and Microservices architecture for building secure and high-performance backend systems, along with React.js, TypeScript, and Redux for developing responsive frontend applications. Experienced in leading feature development, conducting code reviews, and executing legacy migrations from monolithic systems to modern architectures. Proficient in REST API design, secure authentication mechanisms, AWS-based deployments, and Agile methodologies, consistently delivering production-ready and maintainable solutions.

Experience

Full Stack Developer Team Lead | Design Blocks

Oct 2025 – Present

- Leading the end-to-end architecture and delivery of a high-concurrency booking and multi-vendor commerce platform for **Vishwanadh Sports Park**, leveraging React-based frontend and **Java Spring Boot microservices**.
- Architected scalable RESTful APIs and modular backend services to manage dynamic pricing, slot allocation, vendor onboarding, and secure transactional workflows.
- Developed an automated **QR-based digital ticketing system** and integrated secure payment gateways (Razorpay/PayU) with robust webhook validation and reconciliation mechanisms.
- Designed secure authentication and role-based access control (RBAC) ensuring data isolation across multiple user roles.
- Optimized database performance using efficient query strategies and aggregation pipelines to support real-time analytics and revenue reporting.
- Led feature implementation cycles, conducted structured code reviews, mentored junior developers, and ensured adherence to clean architecture and automated testing standards.

Associate Software Developer | CLIM IT Solutions

Jan 2025 – Oct 2025

- Developed and maintained a scalable **ERP web application** using React and Node.js, supporting 500+ concurrent users with modular service-layer architecture.
- Designed and implemented secure RESTful APIs with structured middleware for authentication, validation, and centralized error handling.
- Implemented JWT-based authentication and role-based access control (RBAC) to manage sensitive enterprise workflows.
- Improved application responsiveness through performance optimization techniques including lazy loading and optimized state management.
- Collaborated in Agile sprints, participated in peer code reviews, and supported CI/CD workflows for stable production deployments.

Systems Engineer | Infosys

Jul 2022 – Nov 2024

- Contributed to the migration of the **Connect Web (Virgin Media)** platform from legacy Vanilla JavaScript to a modern React-Redux architecture.
- Developed reusable and testable React components for an enterprise-scale telecom platform integrating with **Spring Boot microservices**.
- Collaborated with backend teams to validate API contracts and ensure seamless frontend-backend communication.
- Enhanced accessibility (A11y), performance, and UI reliability through structured refactoring and testing practices in an Agile delivery model.

Technical Skills

Languages:	Java (17/11), JavaScript (ES6+), TypeScript, SQL
Backend:	Spring Boot, Spring Security, Microservices Architecture, Node.js, Express.js, REST APIs, Hibernate (ORM)
Frontend:	React.js, Redux Toolkit, Context API, HTML5/CSS3
Databases:	MySQL, MongoDB
Cloud & DevOps:	AWS (EC2, S3), Docker, CI/CD Basics
Testing:	JUnit, Mockito, Jest, React Testing Library, SonarQube
Tools & Methodologies:	Git, GitHub, Jira, Postman, Agile/Scrum

Education

Raghu Institute of Technology

Bachelor of Technology — Mechanical Engineering

Visakhapatnam, Andhra Pradesh

Jun 2018 – Jun 2022
